Betterplace - Mobile Application

About Novopay

Novopay is a fintech company which has multiple products for Banking Sector, AEPS & DMT Services in India

Product Summary

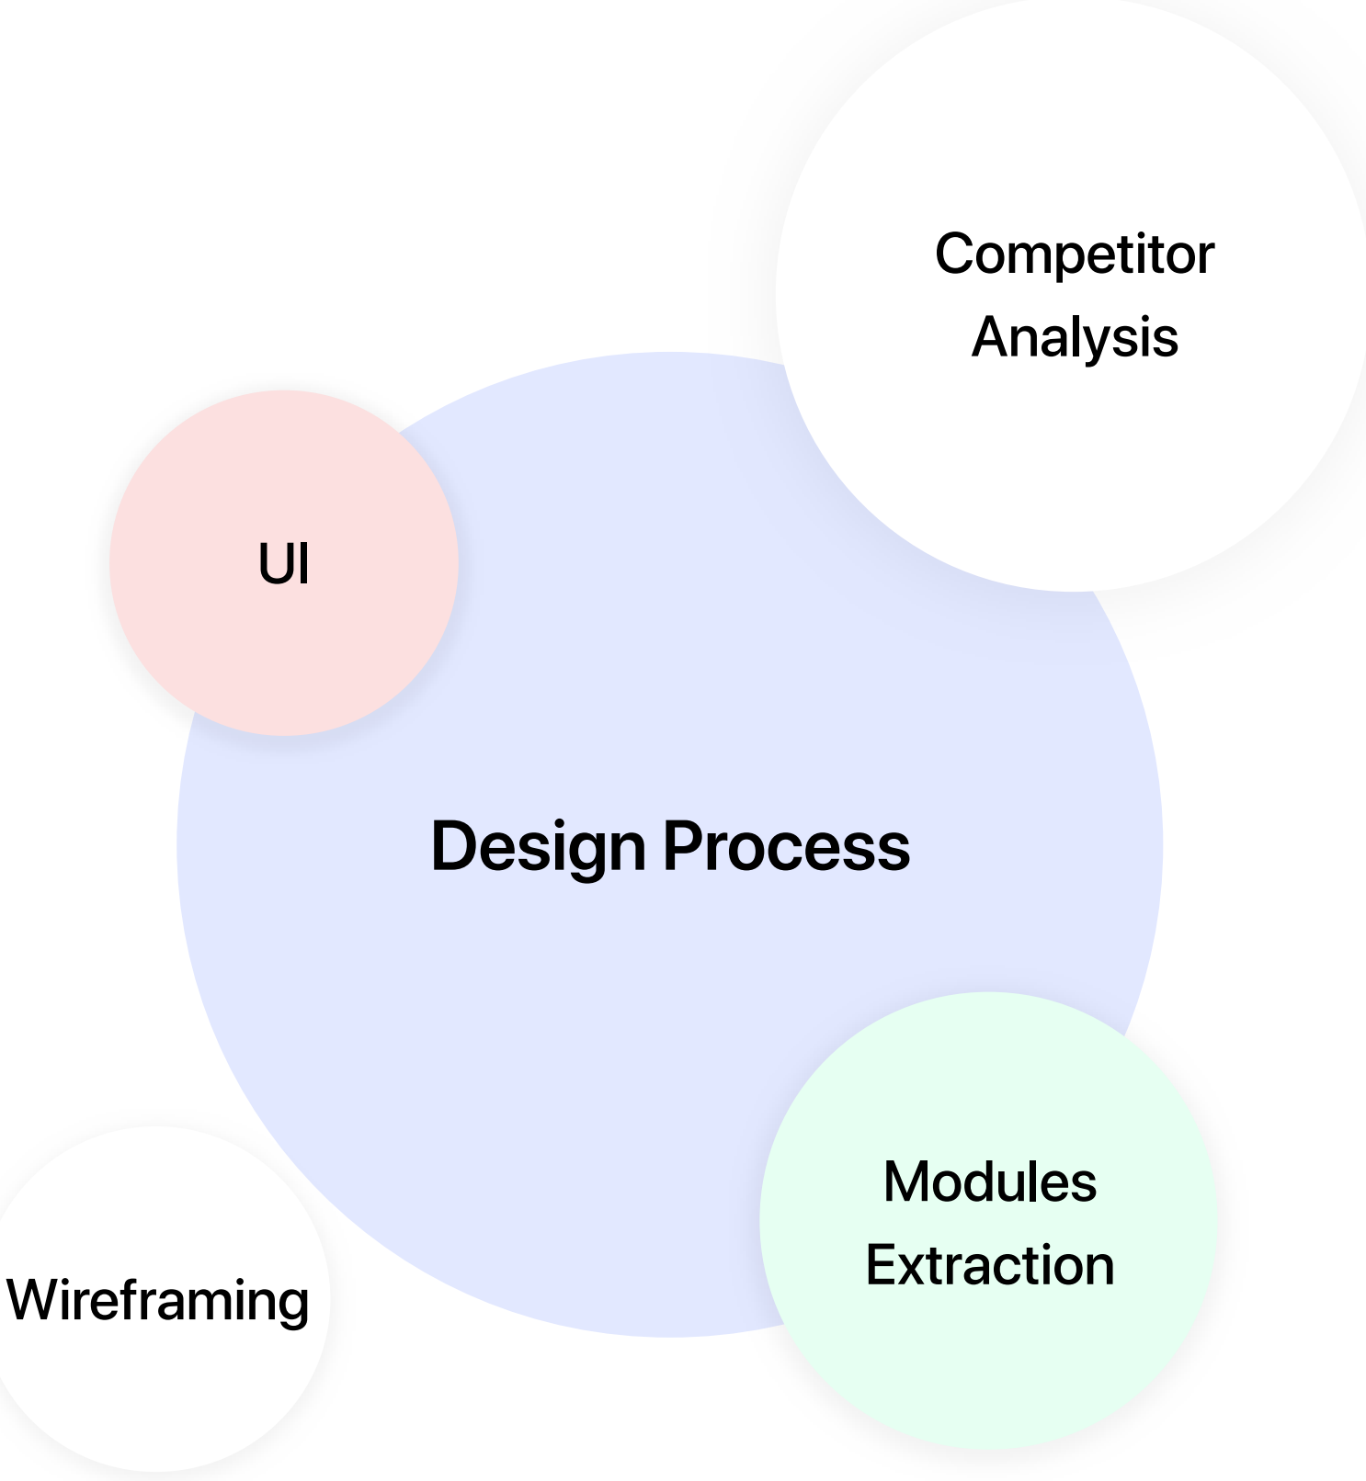
In Novopay they has multiple products for both internal & external functions. Among multiple products I've my hands on experience on products like Betterplace (A White Label Product made for the White Collar's) & Leader Application.

My Responsibilities

My key responsibilities in the Betterplace Application are:

- Competitor Feature Analysis
- Ideation & Brainstroiming the Ideas with team
- Working with the Meta Data Level
- Validating with the gathered data with the Business Analyst
- Check for the reusability of the components from the existing design system
- User Interface Design

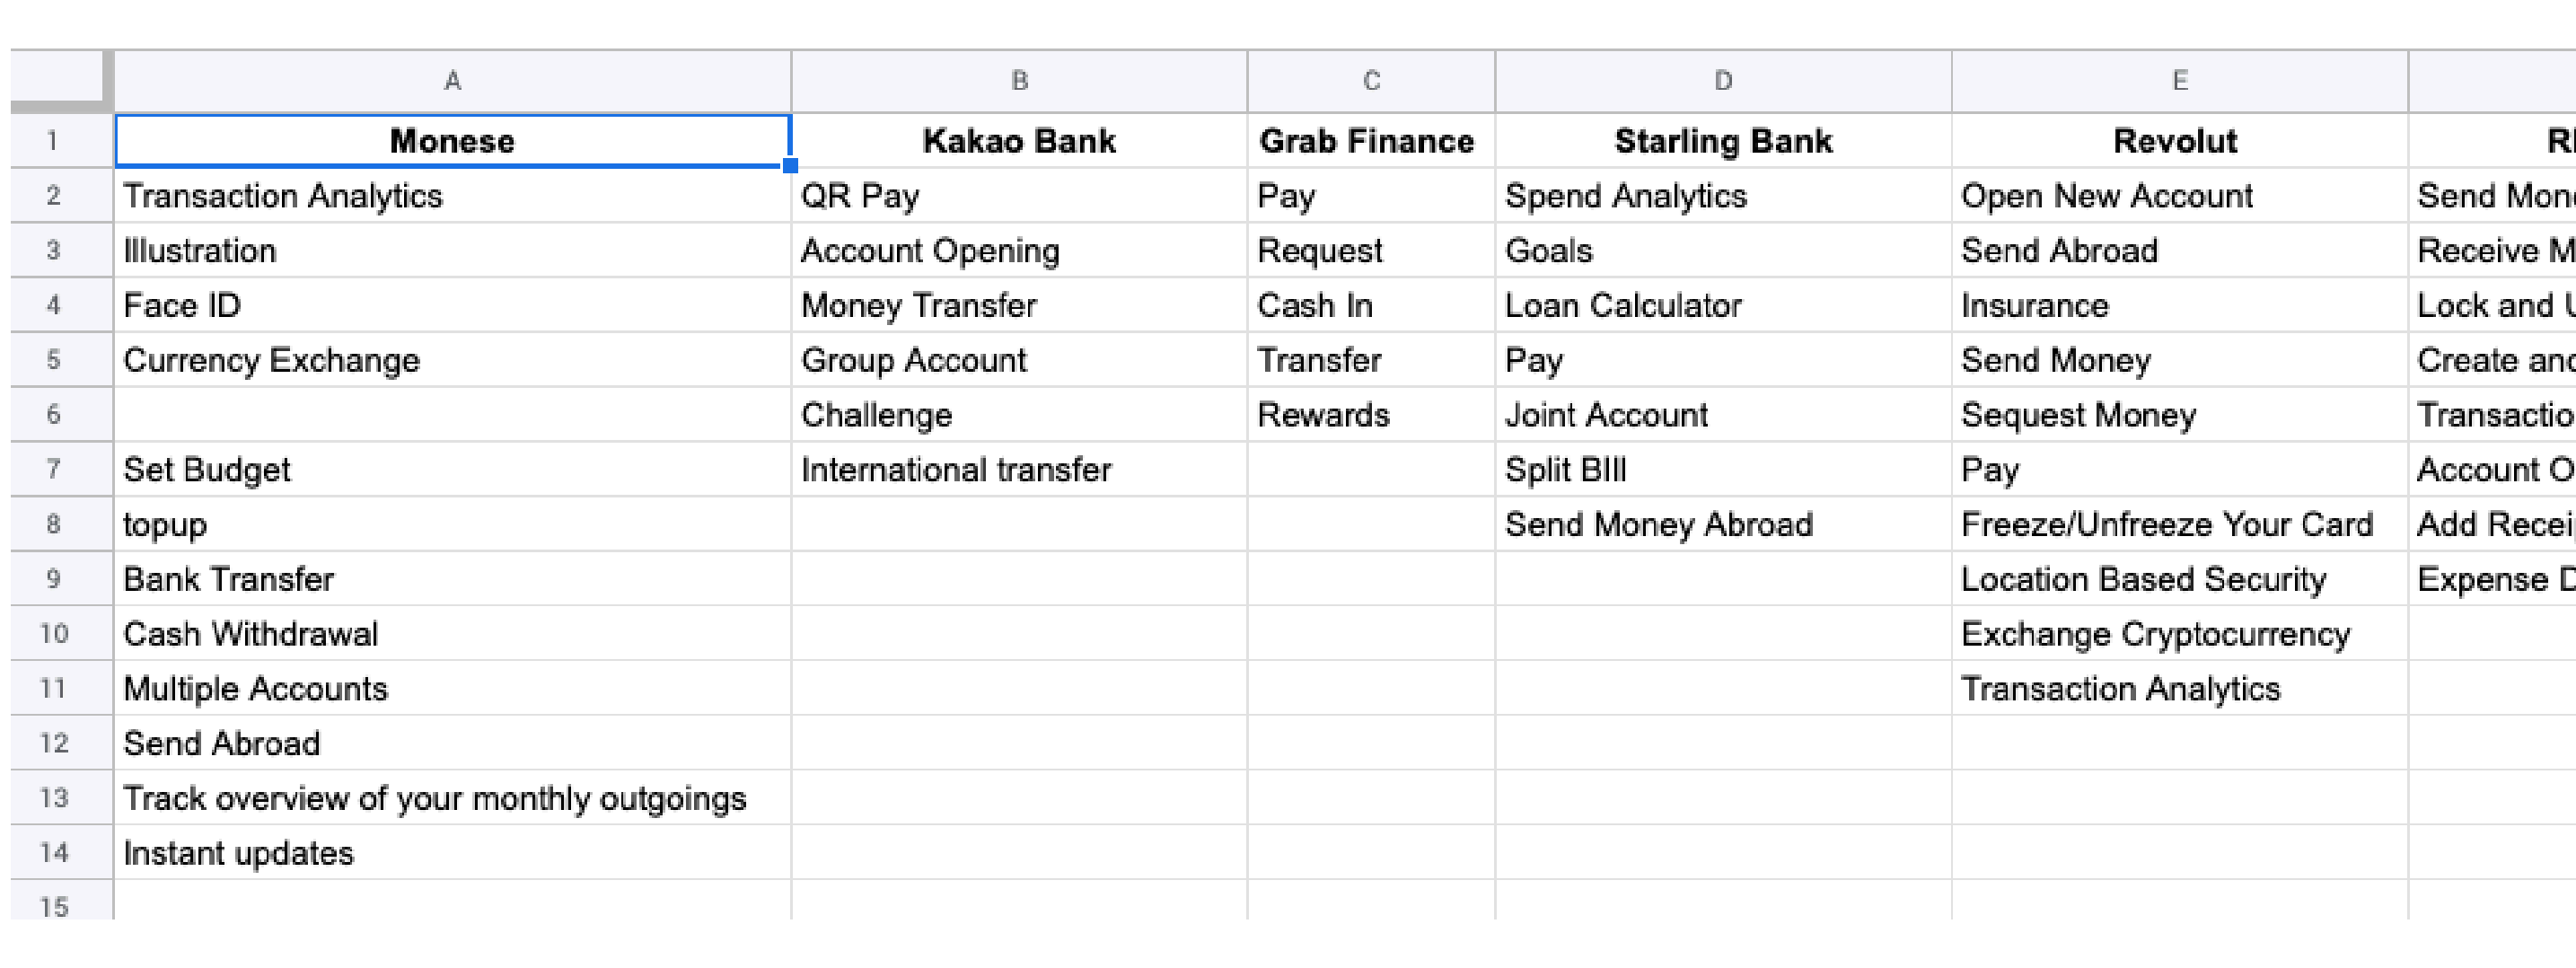
Design Process



Competitor Analysis
UI
Design Process
Wireframing
Modules Extraction

Competitor Analysis

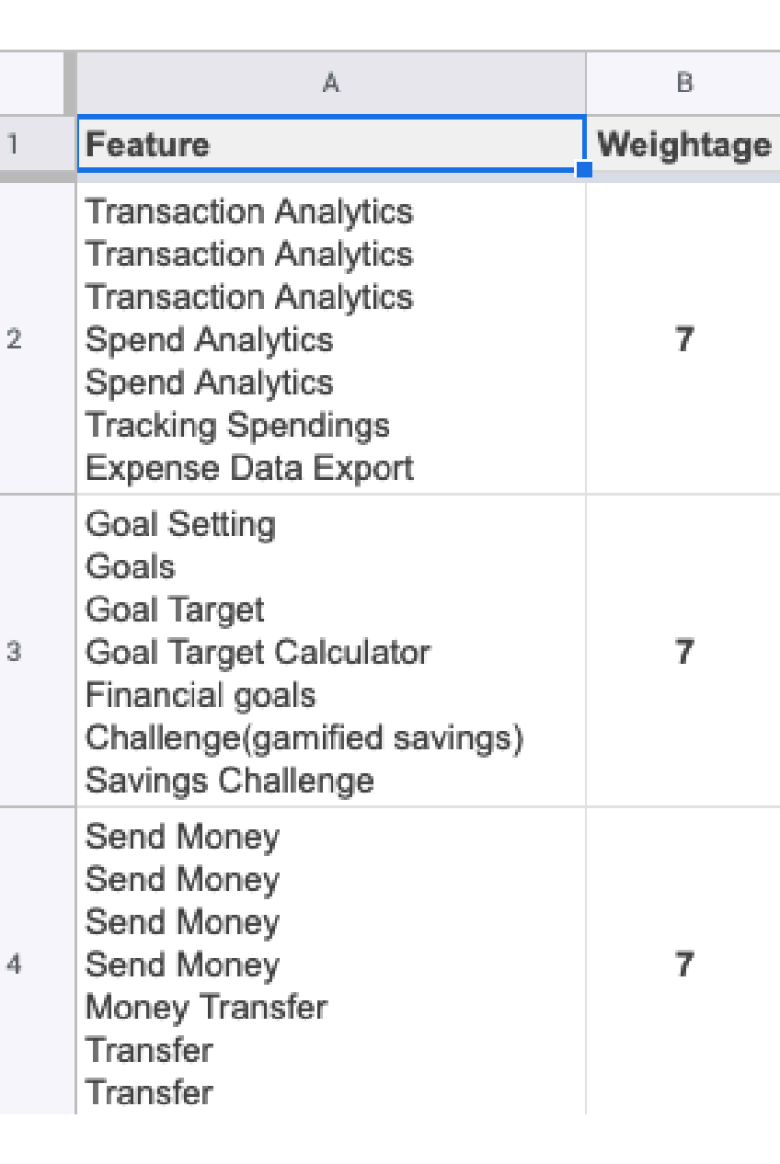
This is the first step carried in our design process where the competitor platform is analysized & their features are beign experienced & they are being documented in the data level.



Monese	Kakao Bank	Grab Finance	Starling Bank	Revolut	R
Transaction Analytics	QR Pay	Pay	Spend Analytics	Open New Account	Send Mon
Illustration	Account Opening	Request	Goals	Send Abroad	Receive M
Face ID	Money Transfer	Cash In	Loan Calculator	Insurance	Lock and
Currency Exchange	Group Account	Transfer	Pay	Send Money	Create and
	Challenge	Rewards	Joint Account	Sequest Money	Transactio
Set Budget	International transfer		Split BIll	Pay	Account O
topup			Send Money Abroad	Freeze/Unfreeze Your Card	Add Recei
Bank Transfer				Location Based Security	Expense D
Cash Withdrawal				Exchange Cryptocurrency	
Multiple Accounts				Transaction Analytics	
Send Abroad					
Track overview of your monthly outgoings					
Instant updates					

Modules Weightage Analysis

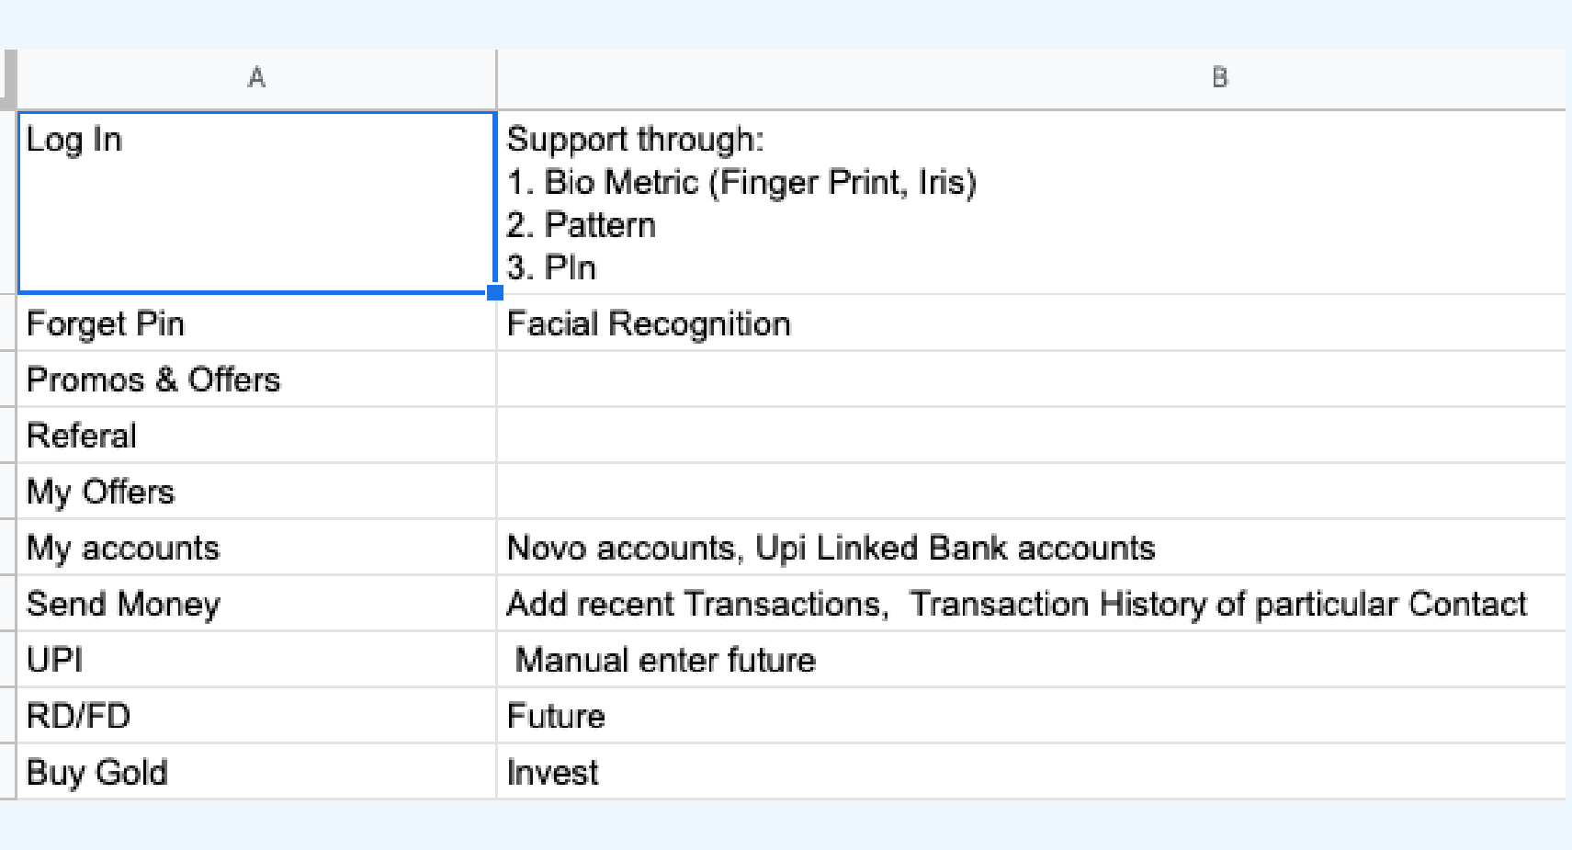
In this stage of design the gathered data are being grouped based on their functionality & the nature of their character & they are given weightage ranking based on their concurrency of occurance, this helped us to identify the features that are essential for a potential customer



Feature	Weightage
Transaction Analytics Transaction Analytics Transaction Analytics Spend Analytics Spend Analytics Tracking Spendings Expense Data Export	7
Goal Setting Goals Goal Target Goal Target Calculator Financial goals Challenge(gamified savings) Savings Challenge	7
Send Money Send Money Send Money Send Money Money Transfer Transfer Transfer	7

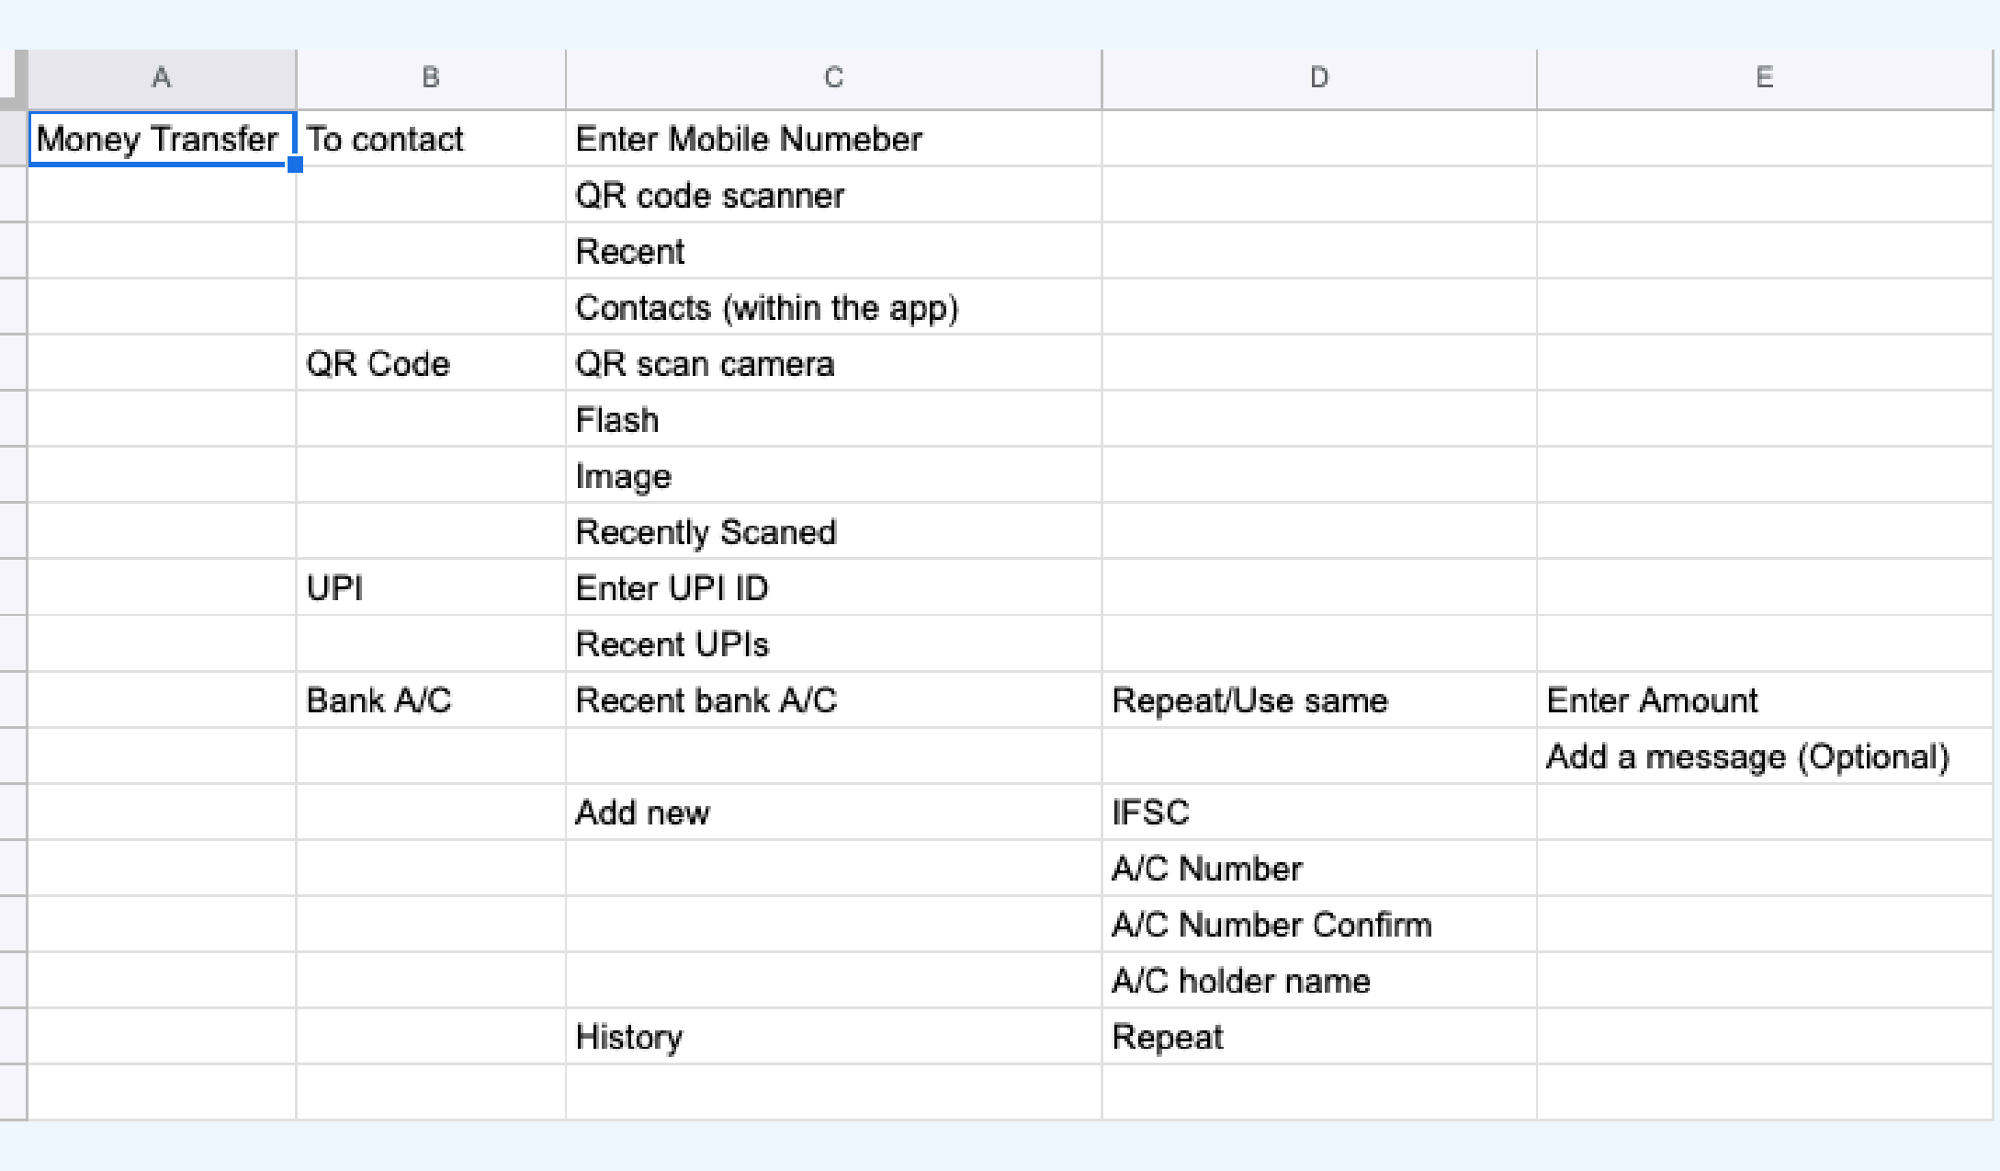
Modules Extraction

The required modules for the product is being extracted based on the weightage of the data gathered & from the datas of the stackholders.



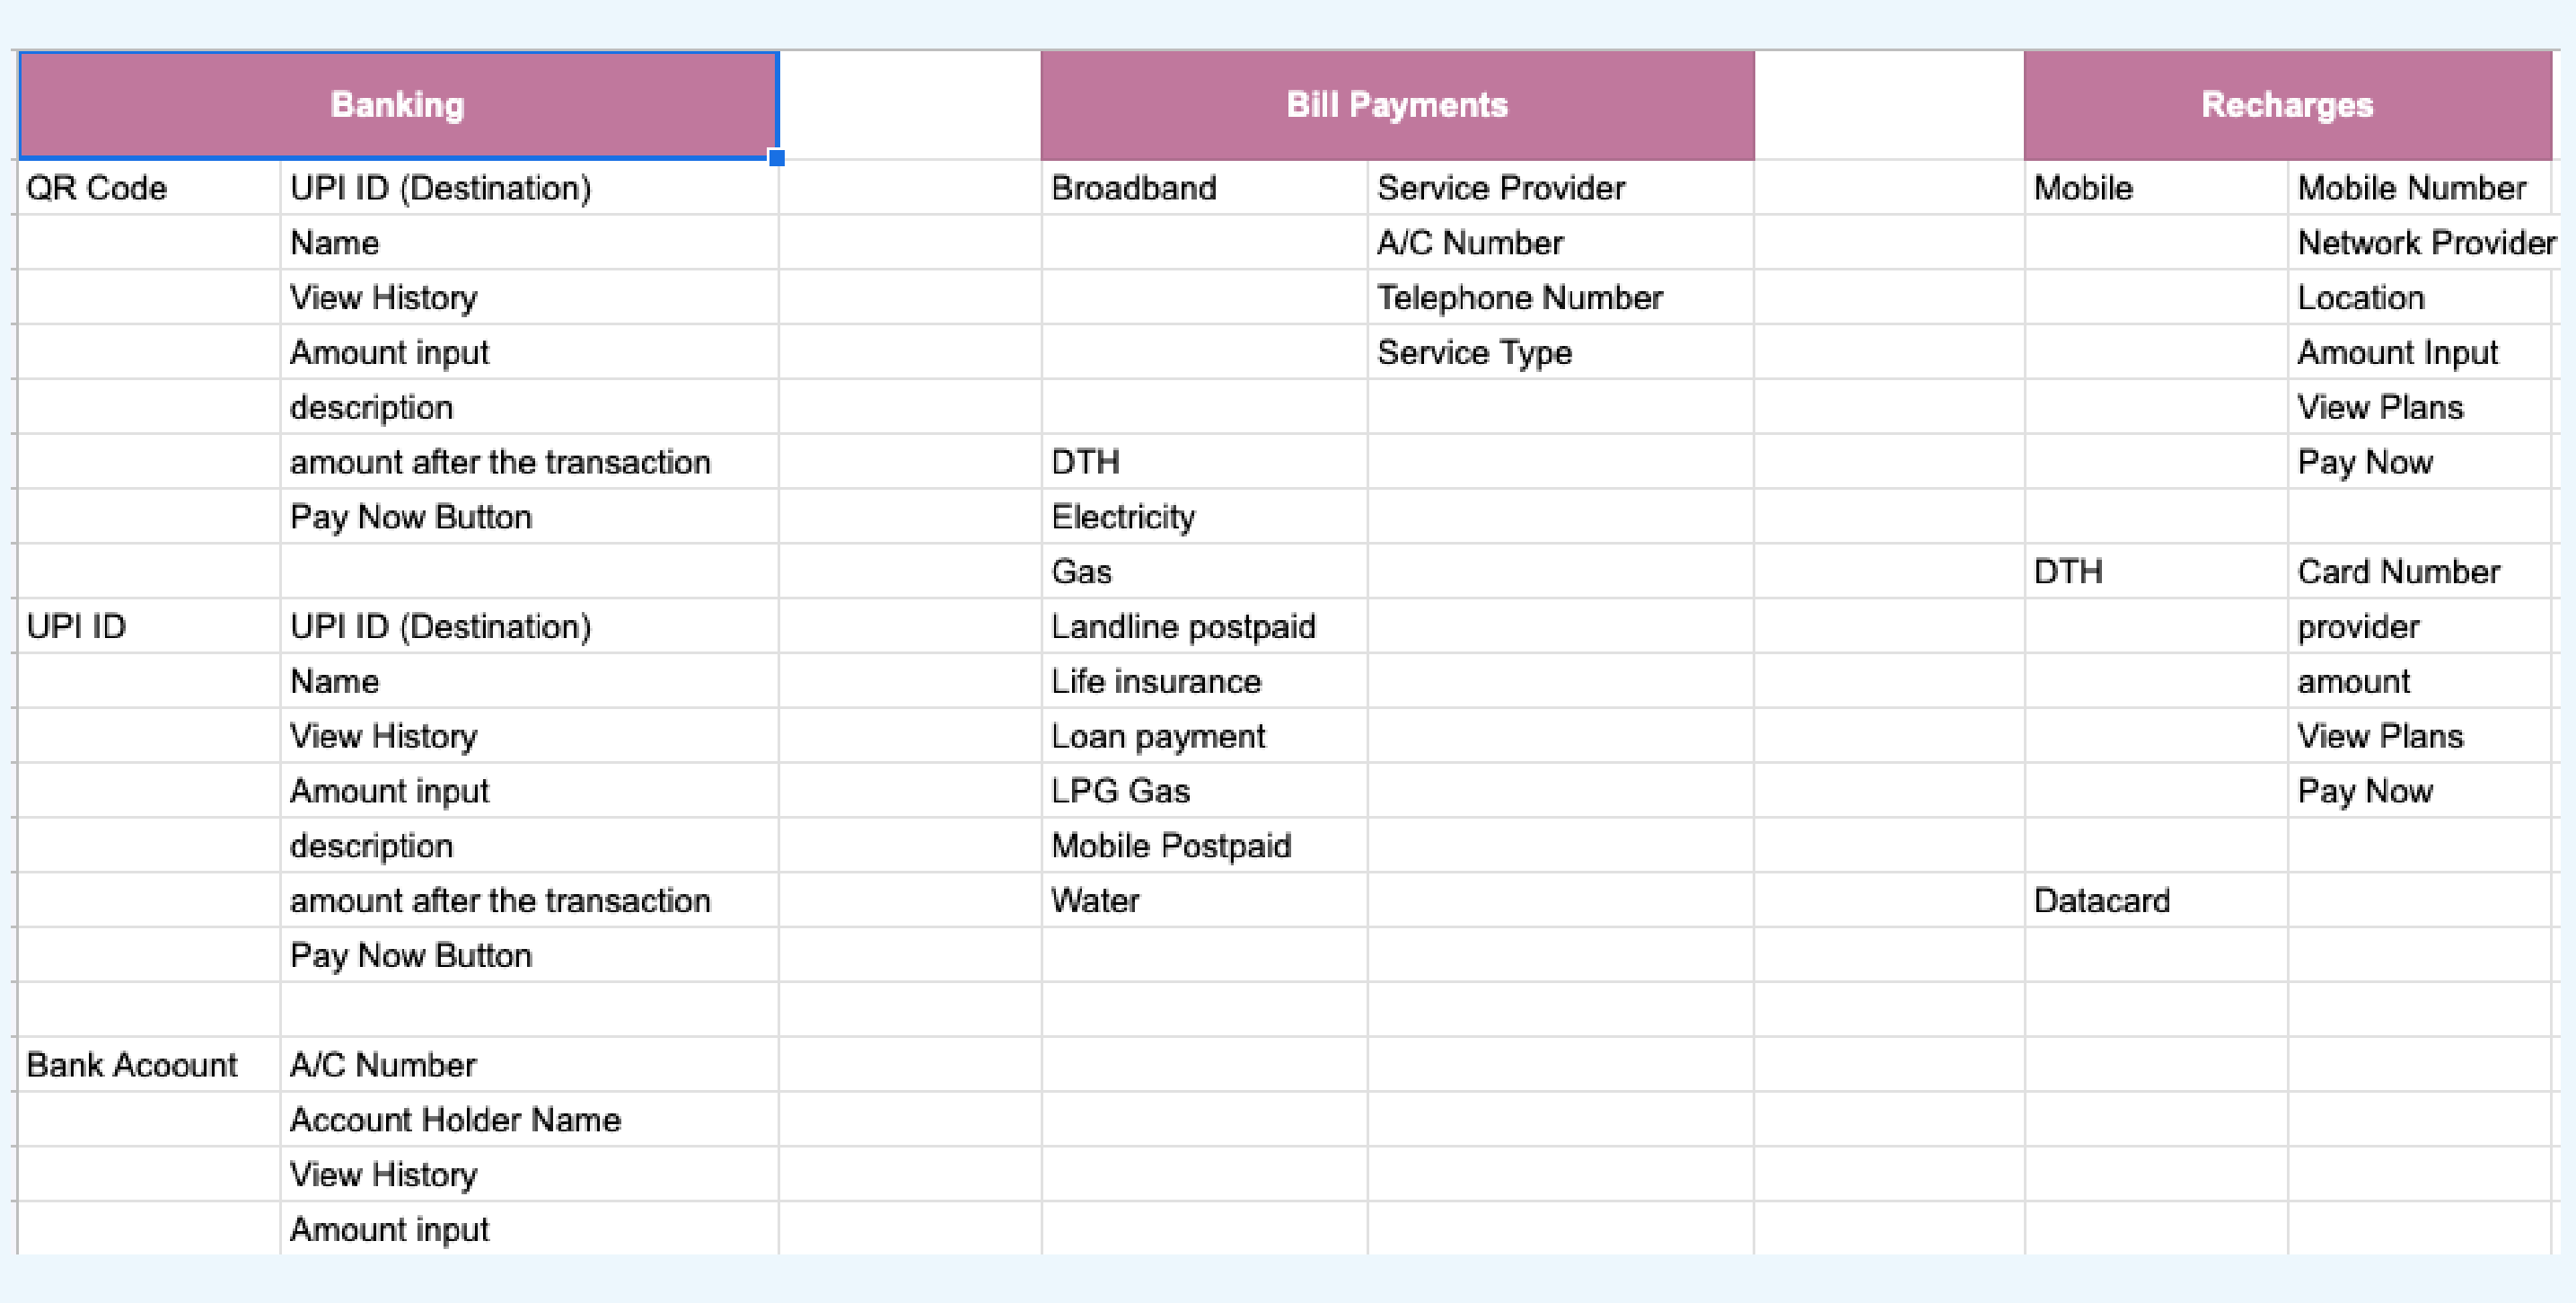
A	B
Log In	Support through: 1. Bio Metric (Finger Print, Iris) 2. Pattern 3. PIn
Forget Pin	Facial Recognition
Promos & Offers	
Referal	
My Offers	
My accounts	Novo accounts, Upi Linked Bank accounts
Send Money	Add recent Transactions, Transaction History of particular Contact
UPI	Manual enter future
RD/FD	Future
Buy Gold	Invest

The modules & their supporting components are being researched & are being listed in the sheets



A	B	C	D	E
Money Transfer	To contact	Enter Mobile Numeber		
		QR code scanner		
		Recent		
		Contacts (within the app)		
	QR Code	QR scan camera		
		Flash		
		Image		
		Recently Scaned		
	UPI	Enter UPI ID		
		Recent UPIs		
	Bank A/C	Recent bank A/C	Repeat/Use same	Enter Amount
				Add a message (Optional)
		Add new	IFSC	
			A/C Number	
			A/C Number Confirm	
			A/C holder name	
		History	Repeat	

The last stage of this process is the grouping of researched datas based on their charactersitic & their functional behaviour



Banking			Bill Payments			Recharges	
QR Code	UPI ID (Destination)		Broadband	Service Provider		Mobile	Mobile Number
	Name			A/C Number			Network Provider
	View History			Telephone Number			Location
	Amount input			Service Type			Amount Input
	description						View Plans
	amount after the transaction		DTH				Pay Now
	Pay Now Button		Electricity				
			Gas			DTH	Card Number
UPI ID	UPI ID (Destination)		Landline postpaid				provider
	Name		Life insurance				amount
	View History		Loan payment				View Plans
	Amount input		LPG Gas				Pay Now
	description		Mobile Postpaid				
	amount after the transaction		Water			Datacard	
	Pay Now Button						
Bank Acoount	A/C Number						
	Account Holder Name						
	View History						
	Amount input						

Wireframing

The wireframing is done only for the homepage of this application to understand the design composition
