KEY PROJECT CONTRIBUTIONS

@ Xeni

- Defined and maintained the **XDS (Xeni Design System)** to ensure consistency, scalability, and reusable UI components across products.
- Contributed to the design and UX improvements of the Xeni website, enhancing usability and visual consistency.
- Led the end-to-end redesign of the Command Centre application, re-crafting the information architecture and in improving workflow efficiency.
- Designed UI and experience for the Lolly Coin website, aligning the interface with Web3 branding and product goals.
- Created business presentation decks and investor pitch decks to support product communication and stakeholder presentations.
- Designed marketing collaterals including brochures and exhibition stall designs for brand promotion and events.

@ Beow.in

- Worked on a startup concept aimed at solving challenges faced by pet buyers and sellers.
- Conducted primary and secondary research, including user interviews and market analysis, to understand user needs and identify key pain points.

- Designed and developed a Minimum Viable Product (MVP) to test the product concept and validated if its a PMF.
- Managed basic internal operations, marketing, and promotional activities to build awareness and attract early users.

@ Adapt.io

- Led the redesign of the prospecting search and filtering experience, simplifying complex filter workflows and improving discoverability of prospects.
- Designed CRM data mapping configurations, enabling seamless integration and field mapping between customer CRM systems and the platform.
- Worked on the CRM data enrichment module, delivering dashboards and record-level insights to help users understand enriched prospect information.
- Monitored user analytics and behavioral data to identify friction points and optimize the overall product experience.

@ Engagedly

- Designed the ‘Diversity and Inclusion’ dashboard, enabling stakeholders to monitor key metrics and gain insights through clear data visualization.
- Redesigned the Customer Help Centre experience, improving information architecture and usability to help users find support resources more efficiently. In thi project gained basic knowledge in HTML & CSS.
- Contributed to the design of the Learning Management System (LMS) module, focusing on course creation, course assignment workflows, and reward generation features.

@ Novopay

- Designed an internal seller onboarding platform for the CX team, simplifying workflows and improving the efficiency of the seller onboarding process.
- Contributed to the design of a white-label mobile payment application, focusing on creating a scalable interface adaptable to different brand identities.
- Created marketing and social media campaign creatives.

@ Cartoon Mango Design Studio

- Contributed to the design of the Glyd Experience App, a tablet-based in-car entertainment platform for travelers, focusing on user engagement and intuitive interaction.
- Designed the driver mobile charging workflows for the Glyd mobile app, simplifying to find near by charging station.
- Developed wireframes for the Metro Cash & Carry buyer application, translating business requirements into structured user flows and interface layouts.
- Created digital e-brochures for both digital and print mediums.

@ Full Creative

- In 3 months internship worked on the AnyWhere works product, minor design task are provided like managing user status in the product.

@ Epic Software

- Involved in working of the infographic designs for the website content and social media posts.
