PROFESSIONAL SUMMARY

Senior Product Designer with 7+ years of experience crafting intuitive, user-centered digital products for SaaS platforms, fintech, and B2B tools. Proven ability to translate complex business requirements into scalable design systems, streamlined workflows, and high-conversion interfaces. Experienced across the full product design lifecycle, from discovery and user research through to prototyping, cross-functional collaboration, and delivery. Leverage AI-assisted tools such as Lovable to rapidly generate prototypes and accelerate stakeholder validation. Adept at working with remote and cross-functional teams in fast-paced startup environments.

SKILLS

Product Design · UX Design · UI Design

User Research · Usability Testing · Wireframing

Dashboard Design · SaaS Products · Basic Vibe Coding

Design Systems · Information Architecture

Prototyping · Mobile App Design · AI-Assisted Prototyping

Cross-Functional Collaboration · Stakeholder Presentations

TOOLS

Figma · FigJam · Lovable (AI Prototyping) · Adobe XD · Illustrator · Photoshop · Clarity · Hotjar · Notion · Jira · Confluence · HTML / CSS (Basic) · ChatGPT · Claude · Gemini

EXPERIENCE

Product Designer II

April 2024 – Present

Xeni · In Office, Chennai

- Defined and maintained the Xeni Design System (XDS), a scalable component library that improved UI consistency across all products and reduced design-to-dev handoff time by ~30%.
- Led end-to-end redesign of the Command Centre application, restructuring information architecture and navigation flows to reduce cognitive load and improve task completion efficiency for operations teams.
- Designed UX and UI improvements for the Xeni website, increasing visual consistency and reducing user drop-off friction across key conversion pages. Also redesigned the user sign-up experience end-to-end, simplifying the onboarding flow, reducing form complexity, and improving first-time user activation.
- Delivered complete UI design for the Lolly Coin Web3 platform, aligning the experience with Web3 branding standards and product goals.
- Used Lovable to rapidly generate AI-assisted prototypes and micro-interaction concepts, enabling faster stakeholder validation and reducing feedback cycles by ~40%.
- Leveraged AI tools to design and iterate on micro-interactions including hover states, transitions, and animated feedback, enhancing product polish and communicating design intent clearly to engineers.
- Created investor pitch decks and business presentation materials that supported product communication and fundraising efforts.

Co-Founder & Product Designer

Dec 2022 – Feb 2024

Beow.in — Career Exploration Platform · India

- Conducted end-to-end primary and secondary research, including 15+ user interviews and competitive market analysis, to identify key pain points in the pet buyer/seller market.
- Designed and shipped an MVP from scratch, validating core product assumptions and testing product-market fit with early adopters.
- Owned product strategy, design, and early-stage marketing, achieving initial user onboarding and iterating based on qualitative feedback.

UX Designer
Sep 2021 – Nov 2022

Adapt.io · Remote

- Led redesign of the prospecting search and filtering experience, simplifying complex multi-step filter workflows and significantly improving prospect discoverability for sales users.
- Designed CRM data mapping and enrichment modules, enabling seamless field-level integration between customer CRM systems and the Adapt.io platform, reducing configuration errors.
- Built enriched record-level dashboards surfacing key prospect insights, improving data readability and usability for sales teams.
- Monitored user analytics and behavioral data via Hotjar and product analytics tools to identify friction points and drive iterative UX improvements.

Associate Product Designer
Sep 2020 – Aug 2021

Engagedly · In Office, Bangalore

- Designed the Diversity & Inclusion dashboard, enabling HR stakeholders to track workforce metrics through clear data visualizations, improving reporting efficiency.
- Redesigned the Customer Help Centre, restructuring information architecture and improving content discoverability, enabling users to find support resources faster and with less friction.
- Contributed to the LMS module design, covering course creation workflows, assignment flows, and reward generation features, improving learner onboarding experience.

Designer
Nov 2019 – Sep 2020

Novopay · In Office, Bangalore

- Designed an internal seller onboarding platform for the CX team, simplifying complex multi-step workflows and reducing onboarding friction for new sellers.
- Contributed to a white-label mobile payment application, designing a scalable, brand-adaptable interface that supported multiple business clients.
- Created marketing and social media creatives to support brand campaigns and product launches.

Jr. Product Designer
Dec 2018 – Oct 2019

Cartoon Mango Design Studio · In Office, Bangalore

- Contributed to the Glyd in-car entertainment app (tablet), designing intuitive user flows for travelers focused on engagement and ease of interaction.
- Designed driver-facing mobile charging workflows for the Glyd app, simplifying the process of locating nearby EV charging stations.
- Developed wireframes for the Metro Cash & Carry buyer application, translating business requirements into structured user flows and interface layouts.

EDUCATION

UX/UI Design Certification · Web D School 2018

Graphic Design Certification · Web D School 2017

B.E. in Electronics & Communication Engineering · Mepco Schlenk Engineering College 2010 – 2014
